## PREFACE

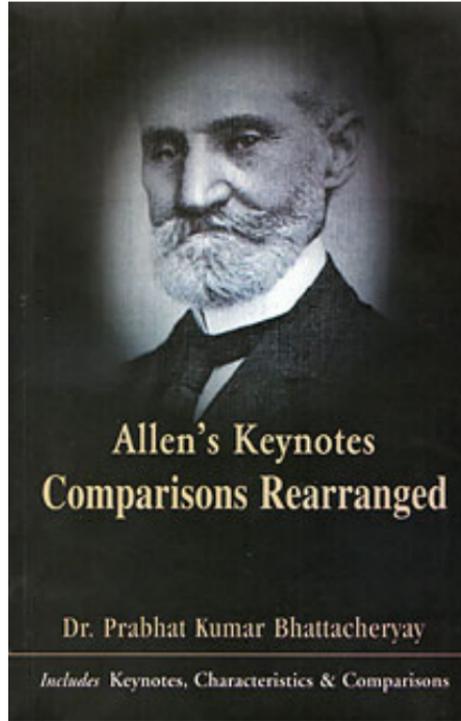

Dr. N. Majumdar, a well known figure of homeopathic world once opined that Allen's Keynotes is a book for students, neophytes and also for the veterans in the field. I did not understand his comment and its inherent spirit at that time, which I could perceive only subsequently.

Every time I studied Allen's Keynote, I learnt something new. I felt it is not only a book of mere keynotes but a book of keynotes with its concomitants having the practical totality of symptoms in every paragraph. The schematic rearrangement of its lines/sentences will only distort its Totality.

I did not, therefore, venture to distort its purity by any means. Rather I tried to highlight the hidden treasures buried in the parenthesis. The very useful comparisons may often be overlooked by even a careful reader. I have brought all the comparative symptoms under the same medicine in the footnote without distorting the bulk of the contents. Readers will be surprised to see many important characteristics of the medicines in this footnote that have not been incorporated in the principal text. Many important useful clinical symptoms are available under the heading 'Relations' of every medicine and the comparative study of this unique part revealed some clinical tips under every medicine, that can prove its excellency in practice. This comparative study will enable the readers to grasp the different shades of distinguishing characteristics of each medicine. I will feel amply rewarded if this book be of any help to the practitioners.
