CONTENTS

Theoretical Part

CHAPTER I

Pages

OSTEOLOGY

3—20

Describe atlas.	3
Describe 1st rib with diagram.	6
(a) What are the peculiarities of clavicle ?	10
(b) Describe the clavicle with its attachments.	10
Describe the upper end of the humerus with diagram.	12
(a) What is the anatomical position of Radius ?	14
(b) Describe the lower end of Radius.	14
(a) What are the parts of the Hip bone ?	15
(b) Describe the upper end of Ilium.	15
Describe the upper end of Femur.	17
Describe the external surface of the Squamous part of occipital bone with a diagram.	20

CHAPTER II

SYNDESMOLOGY

22—26

Give some outlines about shoulder joint.	22
Describe the elbow joint.	23
Describe the hip joint.	24
Describe the ankle joint.	26

CHAPTER III

MYOLOGY

31—52

Give the origin, insertion, nerve supply and action of the muscle "Sternocleidomastoid" with applied anatomy,	31
---	----

(W)

	<i>Pages</i>
2. Describe the origin, insertion, nerve supply and action of trapezius.	32
3. Describe the origin, insertion, relation and nerve supply of Scalenus anterior muscle.	33
4. Describe the origin, insertion, nerve supply, action and applied anatomy of the serratus anterior.	34
5. Describe the origin, insertion, nerve supply and action of pectoralis major.	36
6. Describe the origin, insertion, nerve supply and action of deltoid with its applied anatomy.	37
7. Describe the origin, insertion, nerve supply and actions of the biceps brachii with its applied anatomy.	38
8. Describe the origin, insertion, nerve supply and actions of internal oblique.	40
9. Describe the origin, insertion, nerve supply and action of rectus abdominis.	41
10. Describe the origin, insertion, nerve supply and action of psoas major.	42
11. Give the origin, insertion, nerve supply and action of rectus femoris.	43
12. Give the origin, insertion, nerve supply, and action of gluteus maximus.	44
13. Describe the origin, insertion, nerve supply and action of adductor magnus.	45
14. Describe the origin, insertion, nerve supply and action of the popliteus.	46
15. Describe the origin, insertion, nerve supply and action of diaphragm with openings.	48
16. Describe briefly the ischio-rectal fossa. Discuss its applied importance.	52

	<i>Pages</i>
CHAPTER IV	
SPLANCHNOLOGY	58—126
(a) What is mediastinum ?	58
(b) Mention the sub-divisions of mediastinum.	
(c) What are the boundaries of different mediastinum ?	
(d) What are the contents of superior mediastinum ?	
(e) Name the contents of posterior mediastinum.	
(f) What are the contents of middle mediastinum ?	
Describe the medial surface of both lungs.	65
(a) Describe the intra-pulmonary parts of left bronchus.	
(b) What are the broncho-pulmonary segments ?	
(c) Give their applied importance.	71
Describe the superior surface of tongue with diagram.	76
Describe the parotid gland under following headings :	
(A) Situation, (B) Extent, (C) Parts, (D) Relations, (E) Structures piercing the gland, (F) Structures within the glands.	77
Describe inferior surface of liver* with diagram.	83
Describe tonsil in short.	85
What is pharynx ? Describe the nasopharynx with diagram..	91
Describe the thoracic part of oesophagus.	95
Describe the second part of duodenum.	98
Describe the appendix under the following heads :	
(A) Different position, (B) Structural peculiarities and (C) Blood supply.	99

(via)

	<i>Pages</i>
12. Describe the interior of anal canal.	192
13. Describe the head of pancreas. Give its structure and development.	106
14. What is excretory or biliary apparatus of the liver? Describe each of them.	
15. Describe the urinary bladder under the following headings : (a) Different parts (b) Relations (c) Ligaments (d) Arterial supply (e) Venous drainage (f) Lymphatic drainage (g) Nerve supply (h) Development (i) Structure	
16. (a) What is ureter? (b) What are the parts of ureter? (c) Describe pelvic parts of ureter.	
17. (a) What is prostate? (b) What is the situation? (c) How many lobes of it? (d) Describe the different features with relations.	25
18. (a) What is the normal anatomical position of uterus? (b) What are the parts of it? (c) Name the different ligaments. (d) What is its arterial supply? (e) What is the peritoneal relation of uterus?	

CHAPTER V

ANGIOLOGY

	128-131
1. Describe the interior of right atrium with diagram.	128
2. Describe the left ventricle.	130
3. Describe the interior of the right ventricle of the heart.	131

(/*)

	<i>Pages</i>
Describe the arch of aorta,	134
1 Describe the abdominal aorta, with relations and branches.	136
6, (a) What is the origin of axillary artery ?	138
(b) What is the course of it ?	
(c) What are the parts of it ?	
(d) What are the branches of it ?	
(e) Give the relation of the different parts of axillary artery with the brachial plexus.	
Describe the origin, course, relation and branches of radial artery.	141
Describe external carotid artery.	145
Describe the origin, course, relation and branches of femoral artery.	146
10. Describe the venous drainage of heart.	148
11. Describe the facial vein.	150
12. Describe origin, course, relation, tributaries and applied anatomy of the internal jugular vein.	153
13. Describe about cephalic vein.	157
14. Describe inferior vena cava.	158
15. Describe the long saphenous vein under the following headings :	
(a) Formation (b) End (c) Course (d) Relations (e) Valves (f) Tributaries and (g) Applied anatomy.	160
16. Describe the portal vein. Mention the sites of anastomosis in between systemic with portal side.	162
CHAPTER VI	
ENDOCRINE SYSTEM	
	167—177
1. Describe the thyroid gland.	167
2. Describe supra-renal gland.	174

(X)

	<i>Pages</i>
3. (a) What is pituitary body ?	176
(b) What is the situation ?	
(c) What are the parts ?	

CHAPTER VII

LYMPHATIC SYSTEM

178—187

1. Describe the thoracic duct under the following headings :	
(a) Definition (b) Extent (c) Course (d) Relations (e) Tributaries.	178
2. Describe the lymphatic supply of breast.	181
3. Describe the lymphatic drainage of uterus.	182
4. Describe the lymphatic drainage of the stomach.	183
5. Give a brief account of inguinal lymph nodes. Add a note on its surgical importance.	184

CHAPTER VIII

NEUROLOGY

188—215

1. Describe the internal capsule under the following headings :	
(a) Situation (b) Different parts (c) Fibres passing through it (d) Blood supply.	188
2. Describe the floor of 4th ventricle.	191
3. What is spinal cord ? Describe it in brief.	194
4. (a) What is brachial plexus ?	198
(b) How it is formed ?	
(c) Give the relation of brachial plexus with subclavian and axillary artery.	
(d) What are the branches of brachial plexus ?	
5. Describe the formation, type, situation and branches of lumbar plexuses.	20J
6. Describe the axillary nerve.	205
7. (a) How median nerve is formed ?	206
(b) Describe the median nerve in hand.	

	<i>Pages</i>
(c) What are different branches in arm, fore-arm and hand ?	
(d) Describe the effect of cutting of median nerve just above the wrist.	
8. Describe the sciatic nerve.	211
9. Give an account of obturator nerve.	213

DISSECTION PART

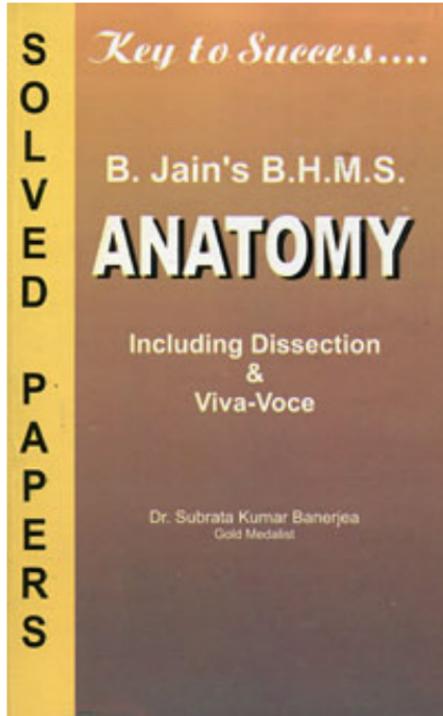

CHAPTER I

DISSECTION

217—261

1. (a) What are the steps of dissection to expose the suboccipital triangle ?	217
(b) What is the boundary of this triangle ?	
(c) What are the contents ?	
2. (a) What are the procedures to step of dissection of posterior triangle of neck ?	223
(b) What is the boundary of it ?	
(c) What are the contents of this triangle ?	
3. (a) Describe the steps of dissection of rectus sheath.	229
(b) Mention the contents of rectus sheath.	
4. (a) Describe the steps of dissection of inguinal canal.	232
(b) What is the boundary of this canal ?	
(c) What are the contents ?	
5. (a) Describe the steps of dissection of axilla.	238
(b) What are the boundaries of axilla ?	
(c) What are the contents of axilla ?	
6. (a) What are the steps of dissection to expose the axillary nerve in scapular region ?	242
(b) Mention the boundary and contents of quadrangular and triangular space.	
7. (a) Describe the procedure to expose the cubital fossa ?	244

	<i>Pages</i>
(b) What is the boundary of cubital fossa ?	
(c) What are the contents of it ?	
8. (a) Describe the steps of dissection of superficial palmar arch.	248
(b) How is it formed ?	
9. (a) What are the steps of dissection of femoral triangle ?	251
(b) What is the boundary of it ?	
(c) What are the contents of femoral triangle ?	
10. (a) Describe the steps of dissection of adductor canal.	254
(b) What is the boundary of it ?	
(c) What are the contents of it ?	
11. (a) What are the steps of dissection of popliteal fossa ?	258
(b) What is the boundary of this fossa ?	
(c) What are the contents ?	
CHAPTER II	
SPECIAL SENSES	
	262—267
1. Describe the nasal septum.	262
ORAL PART	
1. Surface Anatomy	269
2. Osteology	277
3. Syndesmology	305
4. Muscle System or Myology	313
5. Angiology and cardiovascular system	337
6. Neurology	355
7. Special Senses	371
8. Respiratory System	374
9. Digestive System	386
10. Urinary System	411
11. Reproductive System	422
12. Endocrine System	434
