PREFACE

Homoeopathy is a science as well as an art. It is only by artistic application of scientific principles of Homoeopathy that one becomes a successful prescriber, Knowledge of Homoeopathic drug is multifaceted and we learn from many practising homoeopaths different facets of the same drug. I have tried to reach such several facets in a book form.

The material in this book is drawn from class notes of lectures and observations in the O.P.D. of most eminent physicians of the Royal London Homoeopathic Hospital during my post graduate studies from October 1961 to March 1962 and it is my sincere hope that my collection of homoeopathic pearls will improve the prescribing skill of the reader.

All information given in the book relates to three subjects namely Materia medica. Case taking and Practical therapeutic hints,

Some of the unique features of this book are:

Therapeutics on asthma by Dr, M.G. Blackie

Therapeutics on gastric drugs by Dr, T.D. Ross

Therapeutics on coryza, pneumonia, mental states etc. by Dr. Priestman.

- Drug pictures of polychrests by Dr. D.M.Gibson
- Bowel nosodes by Dr. C.O.Kennedy

- Homoeopathic case taking by Dr. D.M. Foubister
- Characteristic of few drugs by Dr. J.C.Mackillop and Dr, Brigier

Among these at places a very good detailed differentiation of the similar looking drugs has been given e.g. Bryonia, Aconite and Belladonna - Sepia and Silicea by Dr. Gibson. Case taking by Dr. Foubister is a model full of rich practical hints for prescribing.

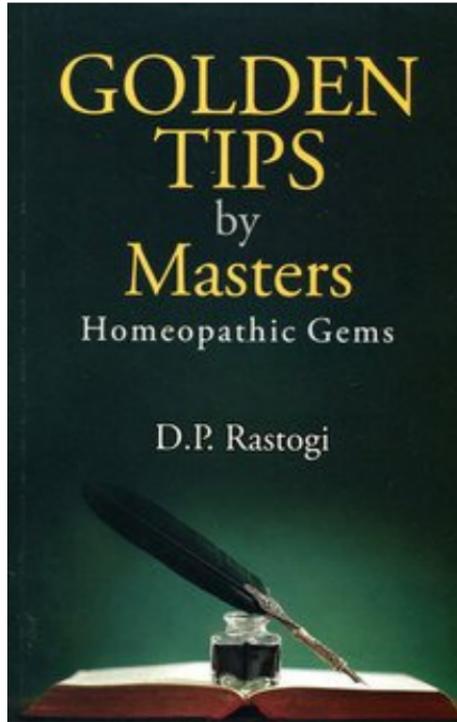

. The matter has been published mostly in the language of the teachers during lectures without making any alteration so as to convey the information and emphasis which was considered important by them. At some places there is a deviation from classical practice but I have preferred to reproduce this faithfully leaving it to the *reader* to derive benefit from this or to ignore it if it turns out to be unhelpful.

I sincerely hope that this venture would be received in the spirit in which it is offered.
