# **PREFACE**

It is with immense pleasure I bring out this edition of **Gynaecology and Obstetric Therapeutics**.

New knowledge of Materia Medica is growing very rapidly. The waves of information are literally poured from various sources.

Homoeopathic Physician takes the complete case, the relevant history, the signs and symptoms and from this data he selected the similimum for a given case it looks simple but it is very difficult task at the bed sides of the patient, to find out or to select true similimum, the curative remedy for particular case, but the therapeutic book on any subject makes easy for physician to prescribed similimum.

Keeping this in mind I have tried to explain few Gynaecological and Obstetrical conditions in this book. I have described causation, constitution, features related disorders, mental symptoms, concomittant and modalities in last.

The book has been written in a lucid language in author's own style in preparing the book, I have utilised the knowledge of number of stalwarts in his profession and consulted many books and publications the author wishes to express his appreciation and gratitued to all of them including the related authors and publishers.
