FOREWORD

I am happy to go through this book. I am extremely glad to note that the author has ventured to write the book at such a young age. The contents are comprehensive and have been presented in a very lucid and interesting manner.

The book has been especially designed and written to help the students of first year to overcome the difficulties that they undergo. It starts with an introduction on Organon of Medicine followed by explanation of drugs; sketches for an easy comprehension and viva questions to have a better grasp.

I am sure it will be appreciated by one and all.

MESSAGE

I had observed the sincerity of Dr. Ritu Kinra while her internship at Lawrence Road dispensary. At such a young age her interest for drawing symptomatic pictures for medicines and thorough observation for the reference of various medicines is highly appreciable. This book would be of immense help to students of homoeopathy and even the physicians.
