FOREWORD

I have great pleasure in writing the foreword to this book of Dr. G.K. Thakkar. The importance of U.T. in India dates to five thousand years. In ayurveda it is stated to be very useful for healthy living. It was during 1977-79 in the days of former P.M. Morarji Desai that this subject was discussed very widely but was followed by very few.

For me it was exactly 20 years back in the year 1975. A patient suffering from lymph node cancer, whom doctors of Tata Hospital had told that he would survive hardly for 1-1/2 year, came to me for treatment as he had great faith in me. I hesitatingly suggested for him shivambu treatment. And to my amazement, the malignant glands in the neck disappeared in a few months, and to-day after 20 years he is kicking fine. This was my first case of shivambu cure. Since then I am myself drinking shivambu and have treated 3000 cases in 20 years.

Dr. G.K. Thakkar, who came on the scene 10 years back has started shivambu crusade not only in India, but also throughout the world. I had great desire to meet this man of mission after reading whose articles in the newspapers I had started U.T. propagation more enthusiastically. Through a common doctor friend accidentally we met at my house one year ago on Narli Poornima day and we both were delighted to meet each other.

After meeting Dr. Thakkar a new chapter started in my life. He involved me as a trustee of Water of Life Foundation. We have toured all over Bombay and throughout Maharashtra for U.T. propagation. Next year we are holding 1st world conference on U.T. in Goa (Feb.,

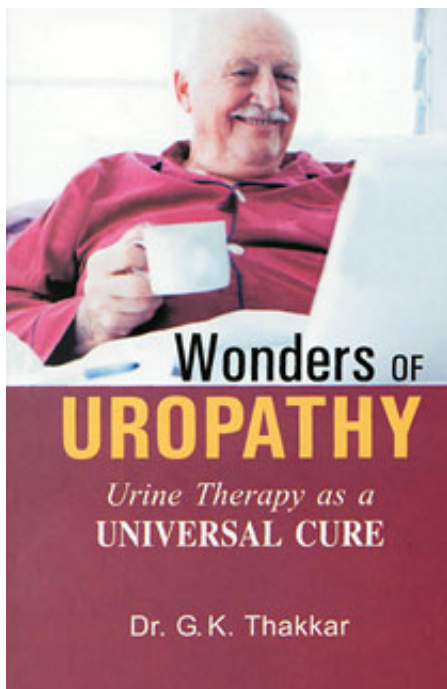

96). Myself being a professor of surgery at Grant Medical College and JJ. Group of Hospitals, I am convinced of the efficacy of this great urography from my own practical experience I have delivered 100 lectures in the last 3 years on U.T. including one at Indian Medical Association and several in rotary clubs. I feel from the bottom of my heart that members of medical fraternity should adopt an openminded approach and give this system a fair trial at least in incurable diseases like cancer, Kidney failure, psoriasis, arthritis, AIDS etc. and experience the thrill of fabulous potentiality of U.T.

Dr. Thakkar is a very hard working, enthusiastic and devoted person with missionary zeal. He has dedicated his life for serving the ailing humanity through shivambu propagation. He has dedicated his life for serving the ailing humanity through shivambu propagation. He has gathered vast practical experience of U.T. by guiding thousands of patients suffering from variety of diseases. I am sure his inspiring and informative book Wonders of Urography will go a long way in educating the masses of our country about adopting this free yet precious therapy and opening a new era in the treatment of deadly diseases, and thereby rescue them from the vicious circle of costly treatments and harmful medicines. I congratulate Dr. Thakkar for so laboriously and painstakingly writing this useful book. I am certain his "Labour of Love" will not only prove useful to patients, practitioners and admirers of U.T. but also will leave its mark on the sands of time.
