Introduction xi

1 Thinking about how remedies are selected 1

Introduction — More about cause and cure — What is the 'simillimum'? — How are remedies selected? — Constitutional aspects of pathological prescribing — The 'pathological simillimum' — Constitutional prescribing — What is a repertory? — Repertorization of thermal sensitivity — The materia medica — What are leading symptoms? — Prescription by causation — Using a therapeutic index, repertory and materia medica — What is a miasm? — What is 'Hering's Law'? — Potencies and frequency of repetition — What is a 'similior'?

2 Thinking about how remedies are made 24

3 Thinking about how remedies work 72

Introduction 73
Part One
Receptor-mediated action of remedies (Type I action) 77
Pharmacodynamic docking and locking — Agonism versus antagonism — Physicochemical concepts in agonism and antagonism
Contents

— Van der Waals’ forces and the Casimir effect — Summation of geometric conformation — Substitution with the field concept — Remedies as fields — Homeopathic blocking or shielding — Allergenic isopathy -Viral remedies (viral nosodes) - Homeopathic blocking of therapeutic drugs — Homeopathic action of material doses of drugs — Duration of action of potentized remedies — Explanation of the actions of Arnica and Euphemia — Explanation of the actions of Mercurius and Arsenicum.

Part Two
Non-receptor-mediated action of remedies (Type II action) 93

4 Thinking about dosage and related matters 103

Introduction — Mother tinctures — Liquid potencies — Dosage of liquid and solid forms — Triturated material — Potency and therapeutic response — Dose repetition — Storage of solid forms — Precautions in taking remedies — Adverse effects of potentized remedies — Administration of remedies to breastfed babies — Complex prescriptions — Placebos.
