PREFACE

Today, when I recall my college days when I along with my batchmates aspired to memorise the entire Materia Medica in the hope of becoming another Dr. Hahnemann, I laugh at the thought as over the years experience has taught me that all who try to learn the entire Materia Medica by rote must ignominiously fail. It is keeping this in mind that I have tried to assimilate the knowledge gained over the years and this book represents the filtered nectar of the various books on Materia Medica that I must have referred during the various cases that I encountered during my clinical practice. It has been my endeavour to use this book as a medium to pass on to the students in simple form all the complexities and nuances which have boggled me throughout.

As a student goes through this book, he will find hidden treasures spread out at different places picked from various books, writings, articles etc. which are difficult to lay hands on, as many of them are either out of print or too costly.

The book has also been written to serve a student's purpose of reference so that he may just refer to one book and not bother himself with ten others which give more or less the same data albeit in different forms. Though the book is a repertoire of readymade references, but it is by no means perfect. Hence, any suggestions, comments or criticism will only help to serve the Homoeopathic community better.

HOMOEOPATHY begins when all the other pathies fail, hence the students must train themselves to say "**Yes**" where others say "No" or only "**May Be**".

Dr. Pameeta Uniyal

FOREWORD

Homoeopathy is spreading like fire today throughout the world, more so in India where day by day more and more students are opting for this therapy which is an alternative system of medicine as their career.

Despite the fact that there are many books on *Materia Medica*, a need is still being felt amongst the students and medical fraternity to have a concise book which will contain all the required information about a particular drug under one heading. Keeping in mind the new syllabus and the difficulties faced by the students this book has been designed by the author who has tried to formulate all the required information under one text. This book has been written on the similar pattern as *Materia Medica for Students Part-I* which was authored by the containing pictorial illustrations for easy remembrance of the drugs.

I wish the author great success who has made an authentic and honest effort to simplify and reveal the hidden meanings of Homoeopathic *Materia Medica* in her book.

Dr. Ritu Kinra
