PREFACE

An overwhelming response and appreciation has been received from various quarters of the country and abroad for *Materia Medica for Students, Part-II*. It has also been translated and published in Spanish language. The same has motivated and endured me to pen down the *Part-III*. This work is an exhaustive collection of different standard *Materia Medica*, systematically arranged for easy understanding of clinical pictures of remedies. In the lessons, typical cases have been quoted, potencies generally used have been emphasized, comparisons with different remedies charted out wherever necessary and cross-references highlighted. Tiresome efforts have been woven in this book to bring it to perfection, which is expected to enhance the quality of work of its readers.

The best teacher you will ever meet will be your patient has been rightly quoted by J. Imberechts. So, after having read the minutest intricacies of this book, if a student learns how to use the *Materia Medica* effectively, then the objective of this book has been fulfilled. In order to make future editions more educational and worthwhile, the user of this volume needs to send suggestions and comments.

From my heart, I present this *Materia Medica* to such Hahnemannians.
