SOME DRUGS OF NEPHRITIS

WITH INDICATIONS

Aconite .. Incipient nephritis.
Stinging and pressing pains, kidney region.
Kidneys act but slightly: urine contains albumen and fragments of casts. Urine hot, dark; red, with white faeces: red and clear. Bloody urine. Also, urine suppressed or retained. Renal region sensitive, with shooting pains. Painful urging to urinate. Aconite has FEAR: tosses about with anxiety. Attacks are sudden, violent. Ailments from fright, vexation, chill: cold winds (Bry., Nux, Hepar).

Apis .. Pain in both kidneys (Bright's disease).
Renal pains; soreness; pressure on stooping.
Pain left kidney (Benz. a., Thuja, K. ars.).
Suppression of urine.
" Acute inflammatory affection of kidneys, with albuminuria, as in scarlet fever or diphtheria: or, after these, as a sequel to acute disease." KENT.
" Inflammation of kidneys closes up the case " (Scarlet fever) " and kills off a good many in allopathic practice, never in homoeopathic hands." KENT.
Typical Apis is thirstless: intolerant of heat.

Arnica .. In inflammation of kidneys, bladder, even pneumonia: its mental state, and the sore bruised feeling all over the body would enable you to do astonishing work.
Does not want to be touched.
Horrors in the night (Acon.). Horror of instant death.
Chill followed by nephritic pains, nausea and vomiting.
Piercing pains as from knives plunged into kidneys: chilly and inclined to vomit.
Urine difficult, scanty, dark, with thick brown sediment. Suppression of urine.
NEPHRITIS

Or a coating which peels in patches. Tereb. has purpuric conditions: ecchymoses (Am.). "Haemorrhages from all outlets, especially in connection with urinary or kidney troubles." NASH. (Comp.Phos., Crot. hor.) Ascites with anasarca, in organic lesions of kidneys.

*Belladonna*  Stinging, burning pain, from region of kidneys down into bladder. Suppression. "No remedy has a greater irritation in the bladder and along the urinary tract."

Bell, pains, clutch: come and go suddenly. Bell., typically, has redness, great heat to touch: dilated pupils.

*Eryngium aquat.*  Must urinate every five minutes: urine dripping away all the time, burning like fire.
Nephritis

Cantharis  The whole urinary organs and genitalia are in a state of inflammation and irritation. Discharge of bloody urine burns like fire. Intensity and rapidity are the features of this remedy. Dull pressing or paroxysmal cutting and burning pains in both kidneys; very sensitive to slightest touch. Urging to urinate. Painful evacuation, by drops, of bloody urine, or pure blood. Intolerable urging, before, during and after urination. Suppression. Violently acute inflammation, or rapidly destructive. (Compare Merc, c.)

Mercurius cor. Tenesmus vesicae with intense burning. Urine suppressed, or hot urine passed drop by drop with much pain (Canth.). Urine, hot, burning, bloody: contains filaments, or flesh-like pieces of mucus: albuminous: shows granular fatty tubuli, with epithelial cells on their surface also in a state of granular fatty degeneration (Ars., Phos.). Patient looks pinched; shrivelled; melancholy. A drug of violence: of inflammations with burning (Canth.) of desperate teuesmus: the "Never get done" remedy, in dysentery.

Mercurius .. Nephritis with diminished secretion of urine, with great desire to pass it. Urine saturated with albumin: dark brown: mixed with blood: with dirty white sediment. Haematuria, with violent and frequent urging to urinate. Urine dark-red; becomes turbid and fetid: smells sour and pungent (Bern, ac.): mixed with blood: white flakes: or as if containing pus: flesh-like lumps of mucus: as if flour had been stirred in: scanty, fiery-red; very dark: With burning and scalding sensation during urination as from raw surfaces (Canth.). Worse at night: worse heat and cold; profuse, oily sweat, which does not ameliorate.
