*A Journey into the
Human Core*

DINESH CHAUHAN

CONTENTS

	Page
Acknowledgements	iv
My Story of Understanding the Human Core	v
 Part I A Journey into The Human Core	
The Energy	2
Vital Sensation	3
Reactions	7
Understanding of Health and Disease	
Difference between Homoeopathy and Allopathy	8
Coping Up	11
The Law of Vibration	16
Change in Vibration Causes Change in Manifestation	17
Classification of Various Vibrational Patterns	18
In depth study of various Forms and Patterns of Energy	24
The Journey from Form to Formlessness	30
Expression of Forms of Energy at 3 different areas of Human Being	31
 Part II Practical Illustrations of the Journey	
“Someone is holding my stomach, pulling it apart and twisting in a harsh way...”	40
“I need a push from behind...”	57
“Someone is a victim and somebody is victimizing...”	64
“My back is tearing me apart...”	68
 Few Quotes by Stalwarts	 87
Bibliography	72

ACKNOWLEDGEMENTS

I would like to thank all the incredible teachers who have contributed so much to the understanding that has been channelled in this book. Some of you I have known as gurus, some I have known as personal friends and others have come to me in the form of books.

First and foremost, amongst them, is my most esteemed teacher, Dr. Rajan Sankaran to whom I am deeply grateful. Both for the concepts he has taught me as well as the foundation these concepts laid, from where I took further steps.

I am grateful to Dr. Kshiti Mehta for working with me on this book. Kshiti shares my delight in finding the right words to clearly present what needs to be said and a fascination with homeopathy and philosophy. From beginning to end of this book we have literally sat side by side and crafted the raw material of ideas and facts into coherent shape. She painstakingly worked through the drafts, smoothening the structure, easing the flow, and making the book a much easier to read.

I would like to thank Dr. Sarika Nanivadekar for her excellent clinical assistance.

For editorial suggestions, I would like to thank Ms. Ambereen Iqbal, Ms. Tejaswini Mishra and Dr. Samina Potia. Also, how can I forget my dear friend Kaare for his editorial skills and suggestions that bought much clarity to the book.

Special thanks go to Dr. Sujata Kumar, the counselor of Jamnabai Narsee School, for fine-tuning and polishing the presentation.

I sincerely thank Dr. Natsu Watanabe for her diligent and industrious efforts towards the Japanese translation of this book.

And last but not the least; I thank my wife, Dr. Urvi Chauhan for being there, as always, and for her constant support and constructive criticism. Printing, publishing and finer as well as final check to the book goes to her credibility, which finally gave a shape to this book.

Above all I would like to thank all my readers.

Vibrational Pattern of Other Sources

The basic vibrational patterns are classified as mentioned above. But there can be some other sources in the universe that are not yet explored and may not be classified in the above known kingdoms.

SUB CLASSIFICATION OF VARIOUS VIBRATIONAL PATTERNS

After classifying the vibrational patterns of different substances into a common group (kingdom), in order to search for a specific vibrational pattern from the universe, we need to further sub classify these common vibrational patterns. In Zoology, Botany, Chemistry and Physics, all the substances are sub classified according to similar patterns. This means that substances belonging to same sub class will have some pattern, which will be common to all of them.

Sub Classification of Vibrational Pattern of Animals

Each animal subclass displays its own unique mode of survival in the form of *a specific vibrational pattern*. In Zoology, it is classified viz. into different subgroups like mammalia (mammals), arachnida (insects), ophideae (snakes) etc.

Let us take for an instance - Class Mammalia.

If we observe the vibrational pattern of any mammal like cow, dog, cat, goat, donkey, lion, zebra, tiger, elephant, monkey, horse etc. the following common features can be appreciated.

Herd behavior (some mammals are solitary)

Caring for young ones

Fight for supremacy within the group

Territory

These vibrational patterns of mammalia can be expressed in human beings in the following way.

Belonging to the group and paying the price for that

Safety within the group

Connection with one's immediate family - togetherness

Strong maternal instinct

Self critical, self-contempt, looking down upon himself

Conflict with self-regarding control of sexuality

Loyalty and honesty

Each sub class is further classified into Order and Family according to the common vibrational patterns. (Like the physical characteristics, behavior pattern, hunting techniques, prey capture, food habits, habitat etc.)

E.g.

Order – Carnivora (bears, cats, dogs, otters, seals, weasels)
Insectivora (hedgehogs, moles, shrews)
Chiroptera (bats) etc.
Artiodactyla (camels, cattle, deer, giraffe, goat, hippos, pigs, sheep)

For instance, the order carnivora is further classified into Family.

Family - Felidae (Cat Family).

Sub Classification of Vibrational Pattern of Plants

Similarly vibrational patterns of plants are also sub classified into different higher orders and family according to the common features like tissue structure, reproductive characteristics etc.

E.g.

Higher order – Liliidae
Family – Agavaceae, Aloeaceae, Dioscoriaceae, Liliaceae etc.

Higher order – Conifers

Family – Taxaceae, Cupressaceae, Toxodiaceae, Pinaceae etc.

Sub Classification of Vibrational Pattern of Minerals

Likewise the vibrational patterns of minerals are also sub classified into metals, cations, anions, salts, acids etc.

E.g.

Heavy Metals - Platinum, Palladium, Iron, Silver, Gold, Nickel, Cobalt, Copper, Zinc etc.

Other Cations - Sodium, Potassium, Magnesium, Calcium, Strontium, Aluminum etc.

Anions - Carbon, Phosphorous, Arsenic, Bismuth, Sulphur, Halogens like Fluorine, chlorine, bromine etc.

Salts – common salt, carbonate of soda, phosphate of magnesia, potassium bromide etc.

Acids - Phosphoric acid, picric acid, fluoric acid, sulphuric acid etc.

According to the atomic number and weight, all the elements and minerals are arranged systematically in 7 rows and 18 columns in the Periodic Table. Hence if we study few of the elements from a particular column or row then we can appreciate the common features running through out that particular column or row.

E.g.

The 2nd Column: It includes the elements like Magnesium, Calcium, Strontium, Barium etc.

On studying the proving of these remedies we can appreciate the common theme that is present in all these remedies i.e. need for support – in the form of protection/guidance/responsibility etc.

The 4th Row: It includes elements like Potassium, Calcium, Iron, Nickel, Arsenic etc. The common theme that is present in all is of security – needing, developing, maintaining, providing or loosing security.

VIBRATIONAL PATTERN OF THE SOURCE

In order to search the exact vibrational pattern of a substance from the universe, we need to know the specific, individualizing and qualifying vibrational pattern and forms of each substance. This peculiar pattern will be first seen in the sub class (Sub kingdom) and then the most accurate individual pattern will be seen in the pattern of that substance itself i.e. *the source*. The striking, singular, uncommon, peculiar and characteristic pattern of a specific substance will differentiate one vibrational pattern from the other.

Let's take for instance, the Family Felidae. This family consists of all types of cats viz. cheetah, lion, leopard, black panther, tiger, jaguar, domestic cat etc. Each one of them has a unique pattern of vibration that distinguishes it from another. (e.g. the way of capturing and killing its prey etc.)

E.g.

Lion: The most frequently used killing method by this cat is suffocation. The lion kills the prey by biting the back of the animal's neck with sharp canine teeth or by holding the prey's throat in its jaws until the animal suffocates.

Cheetah: It is one of the most accomplished hunters within the wildcat species. It is the fastest animal on land achieving high speeds in short durations. During the chase it quickly accelerates to over 50 miles per hour, easily overtakes its prey in a surprise rush and strikes with the paws to make it fall.

Black Panther: This cat patiently waits for its prey night after night. It hunts by stalking and then pouncing on the animal in a surprise attack when the victim passes close enough. It is not a chaser but excels in jumping, tree climbing. Its eyesight and night vision are very sharp.

Tiger: This cat uses camouflage such as trees, tall grass, or other vegetation to hide in while it stalks prey. In a typical hunt, a tiger slowly and silently stalks an animal until it is about 10 m (about 30 ft) away then it pounces and finally kills by sinking its teeth into the victim's throat or neck.

Jaguar: This cat is a good swimmer. It kills its prey by piercing the skull with its canines.

Thus if we understand the deepest most peculiar and most individualizing vibrational pattern of each substance, then our search for the altered vibrational pattern of the human being becomes completely clear. The homoeopathic remedies whether they come from the animal, plant, mineral or any other source, each has a peculiar vibrational pattern. This deepest individualizing vibrational pattern of the homoeopathic remedy matches with the deepest individualizing vibrational pattern of the substances existing in the universe.

In order to understand the human core, we need to know one more component i.e. the Source from where the altered vibrational pattern arises.

Hence after being acquainted with the 'source' we can modify our equation to –

$$\text{Human Core} = \{\text{Source} + \text{Energy Pattern} + \text{Sensation} + \\ \text{Perception} + \text{Feeling} + \text{Reaction (Active/Passive/Compensation)} \\ + \text{Coping up} + \text{P.G.} + \text{P. P.}\}$$

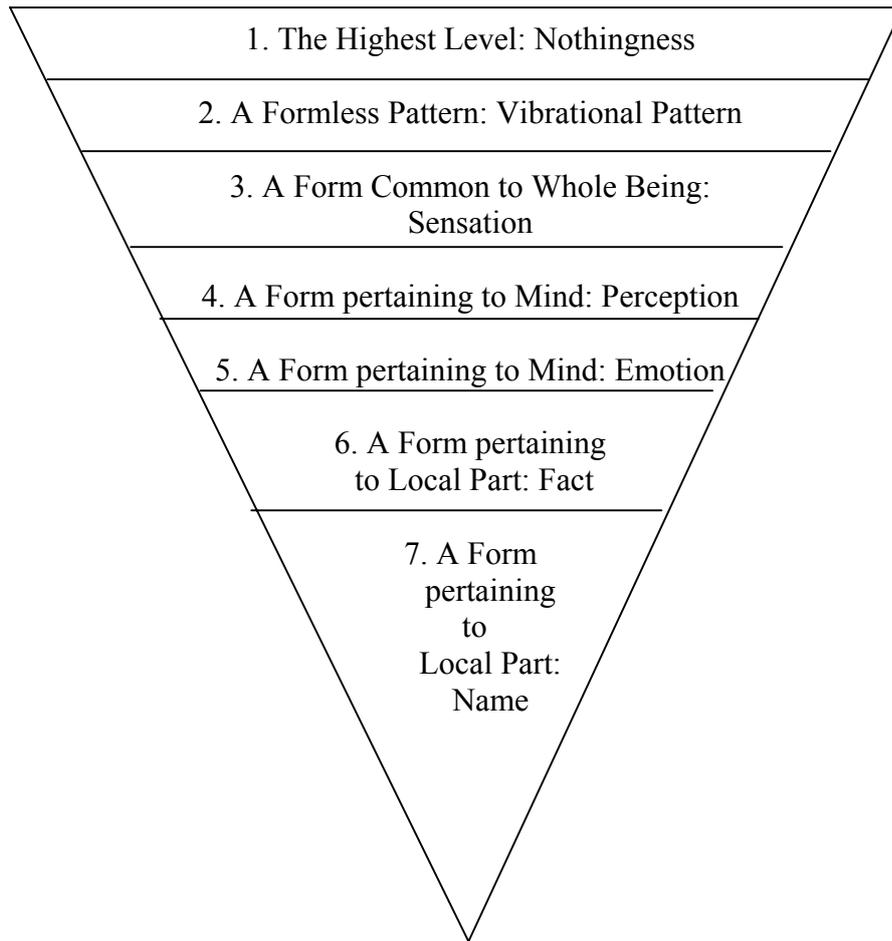

IN DEPTH STUDY OF VARIOUS FORMS AND PATTERNS OF ENERGY

In order to understand the altered vibrational pattern of a human being, we need to know which form a person is in touch with. It is essential to realize that any person will experience the world within and outside him according to the form with which he is in touch. Depending upon this form of energy, his reality within and outside will be. For an instance, if a person is wearing black or red glasses then the outside world will appear black or red accordingly. Hence if a person is experiencing the world within and outside him, through the eyes of his feelings or perceptions, then his reality will be in that fashion.⁸

The following are the forms and patterns of energy from higher to lower forms.

- i) The Highest Level - Nothingness*
- ii) A Formless Pattern - Vibrational Pattern (Energy Pattern)*
- iii) A Form Common to the Whole Being - Vital Sensation*
- iv) A Form pertaining to Mind - Perception*
- v) A Form pertaining to Mind - Emotion*
- vi) A Form pertaining to Local Part - Fact*
- vii) A Form pertaining to Local Part - Name*

8. Dr. Sankaran introduced the classification of these forms of energy that is known as 'Levels of Experience'. According to this concept, every human has 7 ways of experiencing the same truth. This concept holds true not only for Homoeopathy but also for life itself. It indicates not only the level at which the patient experiences symptoms, but also the various levels of all human experience and therefore it is universally applicable.

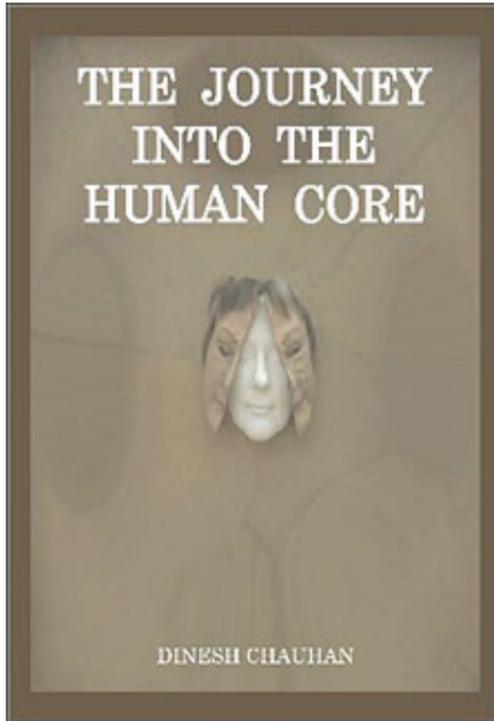

(Various Forms of Energy in a human being)
(Figure 11)

The Highest Level – Nothingness

This is a level that is devoid of any vibrational pattern. It is a level from where the vibrational pattern of each substance arises. It is a level of nothing yet everything is there. It is also the paper on which the entire story is written. It is the highest rung on the ladder but it is also the woodcut of which the entire ladder is made. It is both the goal and the ground of entire sequence. Every ‘thing’ exists only in relation to the whole, and is nothing in itself. The same is also cited in Physics and even in mysticism.

(Nothingness)
