2 Radium 47

Radium bromatum in the Homeopathic Literature 51

Radium bromatum and myositis 52

Myositis may be another indication for Radium bromatum and a very recent case is given here for further confirmation 52

Radium bromatum 53

Juvenile idiopathic arthritis after scarlet fever; severe psychological and physical terror by a psychotic nanny; passivity with loss of initiative 53

X-ray and Radium bromatum 54

Effects of radiation treatment after MALT lymphoma 54

Radium metallicum 55

Insecure class representative: shy but radiating unconscious power; ancestor worship; delayed menarche 55

Radium muriaticum 56

Neurogenic urination disorder with vesicoureteral reflux after operation for sacral spina bifida 56

3 Actinium 58

Actinium nitricum 60

Malignant hyperthermia with fits of cramping and precocity 60

4 Thorium 62

Thorium metallicum 65

Follicular B-cell lymphoma: cannot find the gate leading behind the scenes 65

Thorium muriaticum 70

1. Abandoned by her mother and new to kindergarten: screams and rages like an animal 70

2. Thrombocytosis 71

Thorium nitricum 72

Enthusiastic, very good pupil breaks down after losing his grandparents in an accident 72

Thorium oxydatum 72
Corruption and abuse with complete family breakdown: giving up, viewing every hurdle as insuperable 72

5 Protactinium 74

Protactinium metallicum 75
"Me before You" – fatalism ends in suicide 75

Protactinium metallicum 77
The little troublemaker with ADHD: take Ritalin or you'll be thrown out of school 77

6 Uranium 79

Uranium muriaticum 83
1. Acute lymphatic leukaemia: depressed mother suffocates him with her worries 83
2. Enuresis, depression, thalassaemia; his mother has radiotherapy for cancer 84

Uranium nitricum 84
1. Hereditary chronic lymphocytic leukaemia (CLL): she sees decay and death everywhere but refuses to let it get her down, defiantly laughing in the face of death 84
2. Extremely severe osteoporosis 88
3. Agranulocytosis 88
3. Thalassaemia minor 88
4. Sickle-cell anaemia 89

Uranium metallicum 89
He proves to everyone that he is not a failure; suicide and death in the family 89

7 Neptunium 91

Neptunium muriaticum 95
1. Everything breaks down except the willingness to help; otitis and spastic bronchitis 95
2. Death and suicide in the family; chronic otitis 96

Neptunium muriaticum and Californium muriaticum 97
Helpful and motherly to the point of self destruction; vaginal bleeding 97

Foreword by Jan Scholten

Ulrich Welte has written a wonderful book the 'Uranium series'. He describes the elements and salts of the Uranium series in their remedy pictures and illustrates them with many cases. The result gives a very good insight into those remedies.

Important is that many essences and symptoms from the past have been confirmed. The essence as described in the Element theory are very prominent in the cases. And the remedy pictures that Patricia Le Roux has given are strongly present in all cases.

A central concept is fragmentation. The fragmentation can be in all circumstances. It can be in the form of natural disasters and violence like earthquakes, tsunamis, volcanic eruptions, meteorite impact, lightning. It is symbolic that Thor, after which *Thorium* is named, is the God of thunder and lightning. The fragmentation can be in the form of family disruptions, death, accidents, separation, divorce, family disease like cancer and psychosis. The fragmentation can also come from their own diseases, genetic diseases, cancer, severe diseases.

In all forms one can see something extreme. Everything is extreme, in the circumstances, and inter personalities also. Cancer is extreme for children, genetic diseases is extreme. And the capacity to handle it is extreme. So the patient have extreme qualities, like physical power and energy, mental power, precocity, wisdom, intuition, clairvoyance. So, many aspects in the case as such are not special, like cancer, but that they are present in children make them extreme. The treatments for those diseases like radiation are also extreme. And they come from the radioactive elements of the Uranium series. That is probably the reason that the majority of the cases are of children. For them it is extreme to be confronted with death and destruction, at the beginning of life.

The elements of the Uranium series have too much energy and matter cannot contain that amount of energy, so it can only fall apart. One can say that everything is unusual usual. Or that everything is usual unusual.

I recommend this book to all homeopaths. It shows the essence of the remedies which gives an understanding of them. And Ulrich Welte describes the simple facts and symptoms and how they originate from the essence. It makes the application of those remedies easy and practical. I hope he will write books about the other series as well. Thanks for a great book.

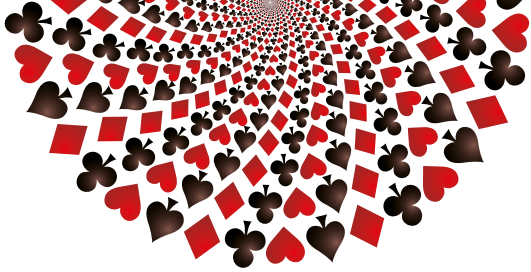
Volcanic eruption, Iceland



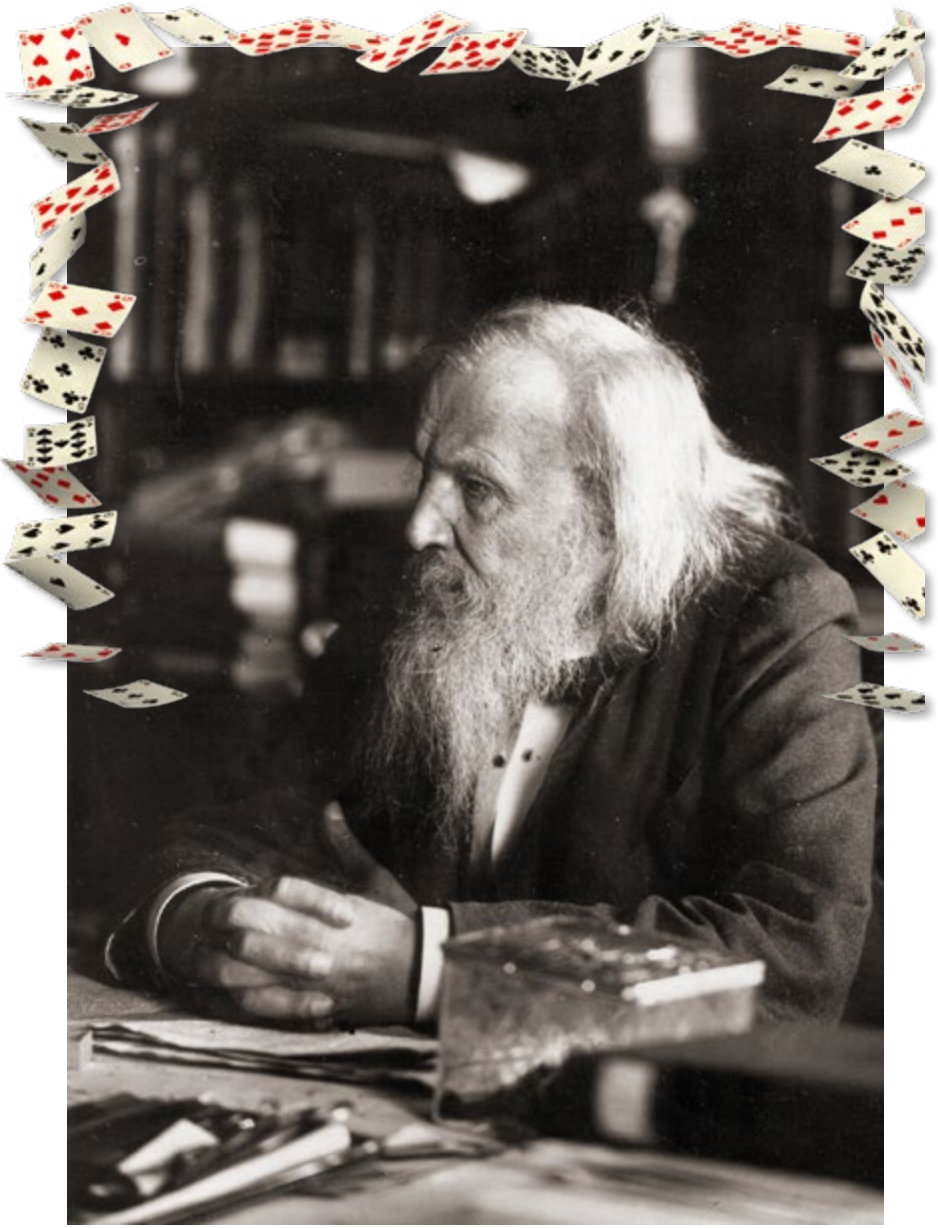
Introduction

Mendeleev's Dream

The first periodic table of 1869 was a simple attempt to classify chemically similar elements although it later turned out to represent a universal truth. At that time there was no knowledge of atomic numbers, protons and electrons but the chemical properties and atomic weights of the elements were well-known. Dmitri Mendeleev drew up the first periodic table, ordered in groups and rows. This configuration came to him in a prophetic daydream.

Mendeleev was a Russian chemist who had long strived to find a sensible system for the 63 elements known at that time. The chemist knew, for example, that the alkaline metals such as lithium, potassium and sodium behave in a similar way – but how could the elements be arranged to also take account of their physical characteristics? He racked his brains to find a meaningful pattern but without success. He could not rest until he had solved the problem. He was just about to embark on a journey – his bags were packed and the coachman was waiting with the horse sleigh to take him to the railway station. Yet he was sunk in thought about his elements. He briefly fell into an inspiring daydream in which playing cards kept flipping on top of his packed suitcase before falling into place in sequence.[1] A pile of aces next to a pile of kings, and each group ordered by suit – clubs on the bottom then spades, hearts and diamonds. The piles got bigger. He immediately sensed that he was close to a solution. He sent the coachman away and continued

1 Strathern, Paul (2001). *Mendeleyev's Dream: The Quest For the Elements*. New York: St Martins Press



Dmitri Mendeleev

brooding though he was still unable to perceive how to apply his card dream to the problem of the elements. Finally he fell asleep in a state of exhaustion, at which point he had his epiphany, to order the elements according to atomic weight: "I saw in a dream a table where all elements fell into place as required. Awakening, I immediately wrote it down on a piece of paper – only in one place did a correction later seem necessary."

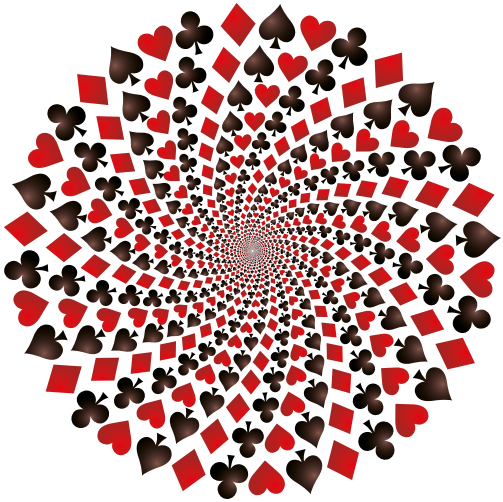
Mendeleev's first periodic table of 1869

The groups or columns of the periodic table therefore correspond to the heaps of cards from the first daydream, and the horizontal sequence can be derived from the increasing atomic weight of the elements ordered within the rows, as shown in the prophetic second dream. These rows were termed periods, from which the name of the system is derived. There was only one disadvantage: due to the limited number of elements known at the time, it only made sense if one left a number of empty slots. Yet Mendeleev was so convinced of the correctness of the truth that had been revealed to him that he interpreted the empty slots as missing elements – he presupposed that these elements must exist but they had just not yet been discovered. He was soon shown to be right. The missing elements were indeed discovered, one after the other, and they all

had precisely the predicted characteristics. This had nothing to do with crystal gazing but rather confirmed the paramount value of a good natural system and the resultant coherent theory. So his basic periodic table was expanded further and proved its worth not just chemically but also later as the basis of atomic physics. Finally it was possible to confirm the system mathematically: the Schrödinger equation enabled it to be derived from quantum theory.

So dreams are not always mere shadows.



culed – similar to *Barium*, stage 2 of the Gold series, although the reason for her fear of being ridiculed was her paranormal abilities, originating in the Uranium series.

Patricia Le Roux in "Radioactive Substances in Homeopathy" describes a very impressive case of *Radium bromatum*, which confirms the properties of the Uranium series, stage 2, and *Bromium*. Resie Moonen published three cases of *Radium bromatum* on the Interhomeopathy website showing the relatively high specificity of the remedy for lichen sclerosus and morphea, a circumscribed, atrophying form of scleroderma.

Radium bromatum and Myositis

Myositis may be another indication for Radium bromatum *and a very recent case is given here for further confirmation.*

A 60 year old man, unobtrusive and a bit shy, a very hard worker and exceptionally gifted and very ingenious mechanic and inventor, suffered from severe muscle pains in the thighs for more than 3 years. High CK values up to 1200 U/l suggested a form of myositis which could not be clarified by even the most advanced diagnostics. Several medicines including steroids did not help sufficiently and the pain made him unfit for work and nearly an invalid. Then an unorthodox thought pointed to a possible solution: as myositis can be induced by statins and the prototype atorvastatin is a product of the mould fungus Monascus purpureus, and fungi are very similar to Actinides, maybe the Actinides could provide a cure for myositis? After all it is a destructive process too. With this thought in mind I was on my way to the practice when my colleague asked me out of the blue whether I had already tried an

Actinide with this patient. Hmm, strange. Then I met our neighbour suffering from cancer who was to be examined by PET scan, and he wanted to know about this radioactive substance they inject, radium or something like that. Hmm, hmm, strange indeed. When I saw the patient, heeding these omens, I just gave *Radium bromatum* 200C, then prescribed LM 6 daily. With this remedy he made such a speedy recovery that I would like to mention the case even though it is only 6 months ago. The man can now work fully without any pain, and his CK values have been steadily improving ever since.

Radium bromatum

Juvenile idiopathic arthritis after scarlet fever; severe psychological and physical terror by a psychotic nanny; passivity with loss of initiative

A case by Patricia Le Roux. Following scarlet fever, a 12-year-old girl is now suffering from juvenile idiopathic arthritis (JIA), which has been progressively worsening for the last two years despite steroid treatment. She also has rheumatic endocarditis and pericarditis.

She is sporty and her father is also a good sportsman but now she can hardly move any more and so sport is virtually impossible: she feels at rock bottom (Uranium series). In complete contrast to before, she is depressed since the illness and she looks prematurely old (Uranium series) with a wrinkled face. All she wants to do is lie around all day watching TV. She prefers to be alone because she feels rejected. It is as if her entire young life has been destroyed. Her mother is a hyperactive artist living in her own world. Her father is rarely at home.

As a young child she suffered serious trauma (Uranium series) due to a psychotic (*Bromium*) nanny who secretly mistreated and hit her. The girl's school first discovered the haematomas caused by the blows and informed the parents. The child was tormented (Uranium series, *Brom*) for a total of six months. At school she is too yielding and has no self-confidence. She thinks she cannot keep up

Stage 6: Challenge: coming up with the proof – halfway there

Proving. Challenging. Bravado. Getting down to it. Resolute. Foolhardy. Dangerous. Baptism of fire. Daredevil. Compelled. Unavoidable. Absolutely necessary. Show no uncertainty. Tough. Armoured. Hidden. Secret. Disgrace.

Uranium series: Extreme situations. Destruction, death. Cruel fate, severely adverse sequence of events. Genetic disease, inherited burdens. Cut to the quick, to the bone. Leukaemia. Disruption in normal sequence of events: too quick = precocity, premature old age; too slow = old burdens hamper healing, simple diseases take long to heal. Decay releases large amount of energy. Phoenix rising from the ashes. Radioactive decay. Chain reaction. Supernatural. Sixth sense. Natural disasters. Fragile; splintering; ruined.

Uranium, stage 6 of the Actinides: confront an overwhelming fate and overcome it; prove with superhuman power that such a thing is possible.

See a severe illness as a challenge, face up to it and defy it.

Prove that a genetic illness does not have to be an overwhelming fate.

Armour themselves internally against severe blows of fate, withdraw inside themselves and train hard.

Feel compelled to counteract the collapse of their world otherwise they would disgrace themselves.

Regard supernatural phenomena as an inevitable challenge and act in a daring way.

Have to very early on confront a world that has gone off the rails.

Signature: Pure uranium is extracted from uranium ores such as pitchblende (uraninite, a mixture of various uranium oxides). When discovered as an oxide it was named uraninite, later renamed to uranium.

The earth mother brought forth the first man without a husband: Uranium takes its name from the giant planet Uranus, which was discovered just before. Uranus is in turn named after the Greek god of the sky, Uranos, which is one of the primal Greek gods, the first-born of Gaia (earth). She bore him in her sleep without male involvement. He was then the first male in the world.

Ancient uranium still radiates warmth: About half of the warmth of the earth, which radiates from our nuclear oven in the centre of the earth, comes from the radioactive decay of natural uranium-238 and thorium-232.

Armoured destroyer of armour: Uranium is used for armour, with a layer of uranium sandwiched between two layers of reinforced steel. On the other hand uranium ammunition is also used as an armour-piercing weapon. A uranium projectile fired with an especially high-powered hollow charge deforms on impact such that a tip is maintained so it can continue penetrating the armour. Uranium ammunition is therefore called "self-sharpening". In addition

this type of projectile partially pulverises on impact, producing hot uranium dust that spontaneously ignites inside the target, setting fire to ammunition or fuel and so causing a secondary explosion in the tank or bunker that is being attacked. "Armour" is an important term for stage 6.

Up to here but no further: Uranium constitutes a break in the periodic table. It is the last element in the periodic table that naturally occurs in large amounts. Therefore in the past all elements with a higher atomic number, which can only be produced in large amounts by artificial means, were termed "transuranium elements".

Uranium ore: pitchblende, uraninite

Releases a massive amount of energy that either destroys everything or helps: Due to its potential property of triggering a chain reaction when the atom is split (fission), the fissionable uranium isotope ^{235}U was the main element used in nuclear power stations and the atom bomb until it was replaced by the competitor *plutonium*, which is generated artificially by additional steps.

Danger from the depths: Uranium is contained in silicate-rich stone such as granite, so it therefore occurs above all in the continental earth crust. Uranium mining causes uranium plus radioactive decay products such as radon to be brought up from below the ground to the surface.

Clinical: *Uranium* seems to be especially suited for the treatment of leukaemia and the side effects of chemotherapy and radiation. Sujit Chatterjee successfully treats 90 % of his cancer patients with *Uranium nitricum* 30C for the side effects of chemotherapy.

Agranulocytosis. Pernicious anaemia. Genetic disease: thalassaemia; kryptopyrroluria. Osteoporosis with end-plate breaks in the vertebrae. Diabetes with nephrotic syndrome. Enuresis. Styes in left upper eyelid.

2. Extremely severe osteoporosis

The patient is a middle-aged woman with very severe osteoporosis with end-plate breaks in the vertebral column and sintering of the vertebrae in the lumbar spine, resulting in almost complete immobility. With homeopathic treatment her condition improved so much that for more than ten years she has been able to once again move freely without any further fractures.

Since her youth she has been someone who likes to pull the strings in the background. She tends towards bigotry and all around she sees the supernatural powers that determine fate, even if there are perfectly obvious mundane reasons for what she sees: everything must be God's will. Before treatment with *Uranium nitricum* 12C in daily doses she was so depressed that she just wanted to hibernate until things improved. This feeling cleared up within the first few weeks of taking the remedy.

3. Agranulocytosis

A delicate woman of around forty interested in the esoteric has had inexplicable bouts of fever for the last year: despite intensive diagnostic efforts they cannot be classified. When her health deteriorated further and she also began to suffer from agranulocytosis, we considered *Uranium nitricum* LM6, which helped her greatly after two weeks. She has been complaint-free for almost one year now, without any episodes of fever and her blood test results have continually improved. A strange symptom also disappeared with treatment: she had the feeling that she could hardly get any air, as if she were breathing through a really narrow opening, as if through a straw.

3. Thalassaemia minor

In a boy with hereditary thalassaemia, the associated blood test results for HbF and HbA2 returned to normal with a few doses of *Uranium nitricum* 200C. He was precocious and used to sometimes behave like an adult: at the age of six he would give speeches like a

Index

Note: The index has been prepared with care and contains not just the most important keywords but in some cases short phrases that are especially characteristic of the ideas contained in the book. The index can also be read as an overview of the main ideas of the Uranium series in the form of keywords since the keynotes of the series and stages appear here in a condensed form. The associations related to these terms are also more or less an expression of the Uranium series and its stages.

Neptunium 91
Neptunium muriaticum 95
Nervous breakdown 38
Neurogenic urination disorder 56
Nidhogg 119
Nobody survived 108
Non-Hodgkin lymphoma 54, 65

O

Oesophageal occlusion 54
Old fault 67
Oral candidiasis 103
Osteoporosis 82, 88
Outbreaks of energy 108
Outer space 57
Overprotective mother suffocates 83

P

Paleness 71, 105, 122, 129
Palms of hands and soles of feet, peeling 105
Paranormal phenomena 51
Paronychia 129
Passive 54
Penicillin 43
Pericarditis 53
Pernicious anaemia 82, 87
Person of depth 104
Phase 7 32, 37-38, 43
Phosphorus 22
Photo finish 113
Planets 41, 92, 100, 107, 120
Pleasure in destruction 95
Pluto 94, 100-101, 104, 107-108
Plutonium 98
Plutonium muriaticum 102-104
Plutonium nitricum 89, 103-106, 108
Pneumococcal 113
Pneumonia 77, 113
Polyglobulia 94
Poor concentration 105
Power 23-24, 120, 125
Precocity 39, 60, 77, 88, 104-105, 114
Premature ageing 53
Premature birth 95
Propensity to violence 108
Prophesizes 89
Prophetic dreams 51
Protactinium 74
Proves to everyone that he is not a failure 89
Psychoses 38

R

Radiation 44, 50, 66
Radiation damage 44, 50
Radiation, effects of 40, 54
Radioactivity 29
Radium 33, 47
Radium bromatum 28, 33, 51-55
R-CHOP regimen 65
Ridiculed 57
Rocket 120
Ruined 42, 120
Ruined family relations 38
Rutherfordium 32

S

Sad child 85
Sadomasochism 102
Scapegoat 54
Seaborg 111
Self-destruction 97
Selflessly 50
Sepsis 56, 60, 95, 113
Sepsis following pneumococci infection 60
Series and stages 25
Severe course of illness 38
Severe mumps 67
Shoot 108
Sickle-cell anaemia 39, 44, 89
Sickly child 85
Side effects of chemotherapy 82
Silica series 22
Silicea 22
Silver series 25, 29-30
Sintering of vertebrae 88
Skin burns 50
Skin cancer 50
Sliding vertebra 118, 122
Solanaceae 44
Soulful 75
Spaceship 107
Spina bifida 56
Spleen 44
Splenomegalia 50, 64
Splenomegaly 89

Splintered 42
Splintered glass 72
Stage 1 22, 34
Stage 2 23, 51, 57, 134
Stage 3 21, 31, 35, 46, 59-61
Stage 4 62, 64, 69, 114, 135
Stage 5 34, 77
Stage 6 79, 81, 83, 87, 106, 135
Stage 7 29, 91, 95
Stage 8 98, 103-104, 108, 118, 136
Stage 9 76, 110-111, 115-116
Stage 17 23, 31-32, 43
Statins 52
Steam hammer 109
Steamrollering 106
Stem cell reinfusion 66
Stomach cancer 54
Stool smells acrid 103
Stroke 44
Submarine 95
Subtle power 120
Suicide 38, 75-76, 89, 96
Sulphur 22
Supernatural 40-41
Susceptibility to infection 85, 87, 119, 121-122

T

Testicular cancer 72
Thalassaemia 39, 44, 82, 84
Thalassaemia minor 88
Thea sinensis 109
Thorium 62
Thorium muriaticum 70
Thorium nitricum 72
Thorium oxydatum 72
Thorium reactor 64
Thorotrast 64
Thrombocyte 39
Thrombocytopaenia 44, 64, 113
Tics 41, 105-106
Trachoma 51
Train crash 95
Transpersonal 50
Transuranium elements 32
Tsunami 104

U

Unbelievable energy 107
Unconscious power 55
Universe 41, 57, 120
Uranium 79
Uranium metallicum 89
Uranium muriaticum 83
Uranium nitricum 28, 33, 51, 82, 84, 87-88
Uranium series 37-38
Uranium series as phase 7 37
Urge to kill 102

V

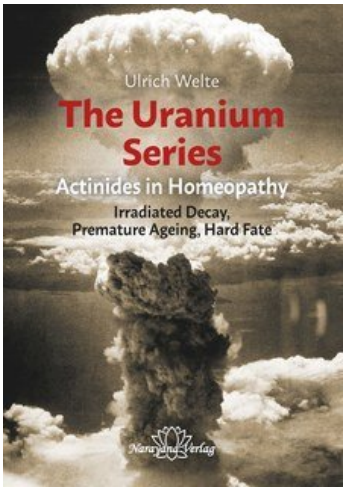
Vasculitis 103
Violence 102

W

Weakness in legs 51
Weighs a ton 103
Will, free 36
Wisdom 41
Worldly-wise 39, 57, 114
Writing is a torture 105

X

X-ray 54
X-ray radiation 50
X-ray stare 104
X-ray vision 99



Ulrich Welte

The Uranium Series - The Actinides in Homeopathy - Radioactive decay, premature ageing, dismal fate

152 pages, hb
will be available 2018

order
